

Where to live in New York

----Capstone Project

Problem Discussion

- More and more people are going to New York for business or traveling or maybe for studying. They may have trouble deciding where to live in the New York City because different neighbors have their own features.
- So this project will help thoses people finding the best place for them to live in New York City.
- We will use data about the restaurant, coffee shops, hotel and so on in New York City and cluster the whole city into different sections.

Data Preparation

- Our data is coming from https://cocl.us/new_york_dataset
- The API we use is from <https://foursquare.com>
- We will get the information about the restaurants, hotels or shops from API provided from FourSquare.
